

Subject: LPFM and the potential impact on FM Translator service in the Oklahoma City area

I am writing to register my support for not allowing LPFM to take priority of local translator services.

One of our local stations, K-LOVE, is operated out of California but broadcasts nationally.

This station is very important to my family and community. The programing is not duplicated in our market.

It is targeted at families and is suitable for all age groups, without concern for content.

There is not another station in our area that provides this listening format. In addition,

K-LOVE provides local information and broadcast time for local organizations that otherwise would not have access to broadcast time due to the cost of obtaining the time.

Losing stations like K-LOVE is not an option for our community. The station is providing a valuable community service and is constantly reaching people of all ages with a positive message of care and support. K-LOVE has found a way to be efficient on a national level but reach individual communities. This is through the FM Translator system.

Please register my comments in opposition of expanding the LPFM service to the detriment of FM Translator users such as K-LOVE.

Sincerely, Tom A. Saunders
